RESPONSE

In response to the action mailed September 7, 2001, please amend the application as follows:

In the claims:

Please amend claim 1, 8, 14, 19, and 23 as follows:

1. (Amended) A reflection type liquid crystal display device comprising:

a plurality of pixel electrodes disposed over an active matrix substrate in the form of a matrix, each of the pixel electrodes connected to a thin film transistor;

D
a light reflective film containing at least two layers on each of said pixel electrodes, each layers having concavities and convexities; and

an insulating film interposed between the active matrix substrate and the plurality of pixel electrodes,

wherein one of said two layers has a first porous surface and the other one of said two layers has a second porous surface.
